

Not just safe – reengineered

AVD vape cartridges, disposables,
and batteries – setting the ^{NEW} benchmark
for flavor, reliability and consumer safety.

AVD[®]
ADVANCED VAPOR DEVICES

True flavors, sublime hits

No longer choose between aromatic flavors or heavenly clouds.

Using advanced mechanics, AVD has quietly redefined cartridge technology. AVD cartridges retain the delicate terpene flavors **and** the satisfaction of the big hit.

Now your carefully crafted oils can be enjoyed – just the way you intended.

Defining reliability

Quality assurance underpins AVD products. We have an industry-leading discard rate of less than 0.01%.

By controlling the supply chain, we source only superior raw materials. And owner-manager oversight, with onsite North American engineers, and quality control experts, ensures exacting standards.

Exceeding safety standards

Guaranteed California Cat III compliant, free from heavy metals, pesticides, glycol, and other harmful toxins.

Cartridges are constructed from BPA free plastic, borosilicate* glass, and organically grown cotton. Critically, our factories exclusively manufacture cannabis cartridges – in a sterile environment, avoiding the risk of cross-contamination.

* Stronger than standard glass, hypoallergenic, and lead-free.

The fill you use, is entirely up to you

- Distillate
- Full Spectrum CO₂
- Rosin Sauce
- Live Resin
- CBD Isolate Blends
- CBD Broad Spectrum
- Terpene Rich Blends
- Solventless Blends

“Purity, flavor, and consistency.”

“Our focus is offering our customers safe and reliable access to high-quality products. AVD products fit the bill – and it’s a pleasure working with a company that understands the complexities of our business and is highly responsive to our expanding requirements.”

LEO MATZ, LEAFWERX

Transforming vaping

We know how much work and pride goes into each extraction cycle and post-processing.

That's why, relying on mechanical, aeronautical, and propulsion principles, our engineers have re-designed the very essence of cartridge technology. From how the oil is absorbed, to the way it's heated and vaporized.

It's how our products deliver exceptional performance. And because our US managed factories are 100% focused on manufacturing cannabis and hemp hardware – with rigorous quality assurance programs – we're able to provide trusted, and reliable products.

Familiar, yet superior

At the heart of every AVD cartridge and disposable, you'll find our new generation core technology.

Unlike in other premium cartridges, AVD's heating coils are fully encased within the ceramic core and not coated in glycol. The result?

True to form flavors are preserved through vaporization without overheating and burning.

Altogether, a superior and safer, sensory experience.

Experience the engineering

- Fully encased heating coil to prevent overheating and burnt flavors
- Two aperture size options, for filling thicker or thinner THC and CBD oils
- Ceramic core design evenly distributes heat for consistent pulls
- Core structure completely absorbs oils avoiding waste and dry-hits
- Various cotton densities control oil flow for perfect vapor flow from the first to the last draw
- Consistent Ohm settings ensures proper voltage delivery, regulating temperature control
- All parts are non-toxic, inert, and pesticide free, to avoid contaminated oil and failed COAs

Cartridges and batteries for all occasions

Your THC and CBD-based terpene-rich formulations are as varied as your customers. Why limit yourself?

Meet the extended family.

AVD RESIN CARTRIDGES
0.5 ML | 1.0 ML

AVD GLASS CARTRIDGES
0.5 ML | 1.0 ML

AVD GLASS DISPOSABLES
0.3 ML | 0.5 ML

AVD SEED BATTERIES

AVD CLONE & STIK BATTERIES

AVD Eazy-Press Glass Cartridges

Easily the most advanced cartridge.

Increase filling and capping throughput with the child tamper-proof AVD Eazy-Press.

Designed for rapid, high-end, high-production. A low torque, thumb snap-on locking system, secures the mouthpiece, even without an arbor press.

Mouthpiece Options

➤ **Ask us** about Thompson Duke ACF1 fill ready trays with mass capping. Speed up your production and save costs.

- 1.0mm and 2.0mm aperture options for thinner or thicker oils
- Available in 0.5ml and 1.0ml tank volumes
- Top loading and compatible with most filling machines
- Works with a universal 510 thread battery
- AVD proprietary ceramic core for genuine flavor retention
- Constructed from durable borosilicate glass & non-toxic parts

AVD Glass Cartridges

Premium THC and CBD oils, deserve an elite cartridge.

Showcase your precious oils and terpene blends for the luxury market, with a stylish AVD Glass cartridge.

Mouthpiece Options

- 1.0mm and 2.0mm aperture options for thinner or thicker oils
- Available in 0.5ml and 1.0ml tank volumes
- Top loading and compatible with most filling machines
- Works with a universal 510 thread battery
- AVD proprietary ceramic core for genuine flavor retention
- Constructed from durable borosilicate glass & non-toxic parts

AVD Resin Cartridges

Predictably popular.

Cost-effective without compromise. AVD Resin cartridges satisfy high volume producers, are non-refillable, and child tamper-proof.

Mouthpiece Options

- 1.0mm and 2.0mm aperture options for thinner or thicker oils
- Available in 0.5ml and 1.0ml tank volumes
- Top loading and compatible with most filling machines
- Requires an arbor press to cap
- Works with a universal 510 thread battery
- AVD proprietary ceramic core for genuine flavor retention
- Constructed from durable BPA-free resin & non-toxic parts

AVD Glass Disposable Cartridges

Smart innovation for optimum vaping.

Ready to go with an elegant, soft-touch, rubberised matte finish. Works straight out the packaging for new or regular vapers, who want an advanced yet relaxed option for on-the-go, or when on vacation. Draw activated. SmartPulse power-wave technology and an in-built carburetor, produce an exceptional vapor flow.

Mouthpiece Options

Cartridge

- 1.0mm and 2.0mm aperture options for thinner or thicker oils
- Available in 0.3ml and 0.5ml tank volumes
- Top loading and compatible with most filling machines
- AVD proprietary ceramic core for genuine flavor retention
- Constructed from durable borosilicate glass & non-toxic parts

Battery

- Draw activated
- Available with or without a micro USB rechargeable port
- Discreet size
- Smaller battery, and extended life reducing environmental impact
- SmartPulse power-wave technology for consistent flavors
- Works with a universal 510 thread

AVD Seed Battery

Smooth magnetic cartridge drop-in. Striking ergonomic design.

Haptic feedback for intuitive use. Low and high heat setting and SmartPulse power-wave technology, for enhanced flavors or resounding hits. And a powerful chipset for extended battery life with a micro-USB port for easy recharging.

- Draw activated without complicated buttons
- Micro-USB port for easy recharging
- Haptic feedback for intuitive use
- Low/high heat setting for fullsome flavors and thicker clouds
- SmartPulse power-wave technology for a consistent experience
- 350 mAh rated
- Short circuit and overcharge protection
- Comes with a 510 thread magnetic drop-in adapter and USB micro charger

AVD Stik and Clone Batteries

Bursting with industry-leading innovations.

The AVD Stik and Clone slim draw activated batteries are compact and discreet. Both have an elegant soft-touch, rubberised matte finish. Advanced chipset for extended battery life. Micro-USB charge port for extra shelf-life. SmartPulse power-wave technology and a carburetor for the perfect vapor stream.

- Draw activated
- Micro-USB port for easy recharging
- Universal 510 thread
- Smart Pulse power-wave temperature control for consistent flavors*
- Carburetor for airflow control
- Low/high heat setting for refined tastes or full rips*
- Stik 180 mAh / Clone 350 mAh rated
- No complicated button combinations
- Short circuit and overcharge protection circuit
- Full charge and low battery LED

* Stik model only

Customize and stand out

Make your mark.

Customize your AVD cartridges, disposables, and batteries with your distinctive branding and trademarks. You can even create special limited edition custom sets for exclusive clients or to celebrate events.

With ultra-fast lead times, AVD's in-house and US-based design experts are ready to advise on a range of design options.*

* For all customization options and parameters, please see our full customization brochure.

Customized cartridges

Leave a lasting brand impression on your customers. Collaborate with AVD's designers on your custom design.

- Logo engraving
- Printing, etching, painting, in most colors
- Distinctive mouthpieces
- Custom color finishes
- Compliancy engraving and printing

Customized disposables

Disposables are the perfect boost for your brand visibility.

- Rubberized battery coating in almost any color
- Distinctive LED battery lighting
- Stylized mouthpieces
- Compliancy engraving and printing

Customized batteries

Reinforce your name awareness. AVD batteries are engineered to last. So should your branding.

- Almost any battery color
- LED power on/off light
- Laser engraving and pad printing
- Anodised, powder coating, rubberized finishes
- Metallic, print, and etched finishes
