

Not just safe – reengineered

AVD vape cartridges, disposables, and batteries – setting the **new** benchmark for flavor, reliability and consumer safety.

AVD[®]
ADVANCED VAPOR DEVICES

True flavors, sublime hits

No longer choose between aromatic flavors or heavenly clouds.

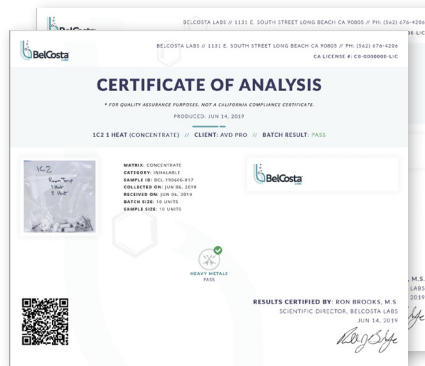

Using advanced mechanics, AVD has quietly redefined cartridge technology. AVD cartridges retain the delicate terpene flavors **and** the satisfaction of the big hit.

Now your carefully crafted oils can be enjoyed – just the way you intended.

Defining reliability

AVD has an industry leading discard rate of less than 0.01%.

By controlling the supply chain, we source only superior raw materials. And owner-manager oversight, with onsite North American engineers, and quality control experts, ensures exacting standards.

Exceeding safety standards

Guaranteed California Cat III compliant, free from heavy metals, pesticides, glycol, and other harmful toxins.

Cartridges are constructed from BPA free polyresin, quartz* glass, and organically grown cotton. Critically, our factories exclusively manufacture cannabis cartridges – in a sterile environment, avoiding the risk of cross-contamination.

* Stronger than standard glass, hypoallergenic, and lead-free.

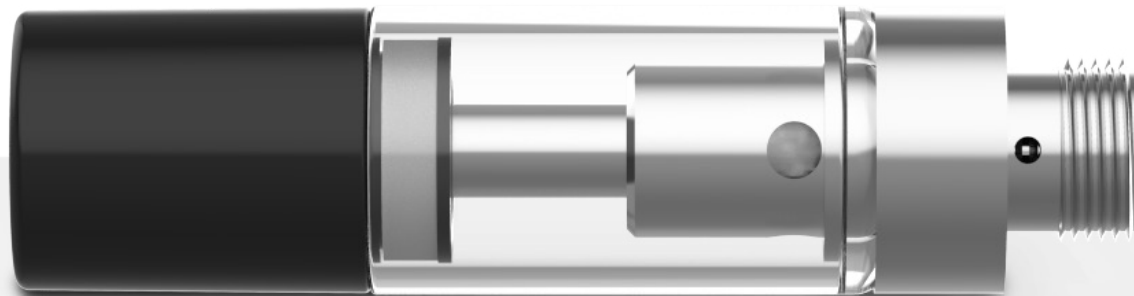

The fill you use, is entirely up to you

- Live Resin
- Rosin Sauce
- Full Spectrum CO₂
- Distillate
- CBD Isolate Blends
- CBD Broad Spectrum
- Terpene Rich Blends
- Solventless Blends

“Purity, flavor, and consistency.”

“Our focus is offering our customers safe and reliable access to high-quality products. AVD products fit the bill – and it’s a pleasure working with a company that understands the complexities of our business and is highly responsive to our expanding requirements.”

LEO MATZ, LEAFWERX

Transforming vaping

We know how much work and pride goes into each extraction cycle and post-processing.

That's why, relying on fluid dynamics, aeronautical, and propulsion principles, our engineers have re-designed the very essence of cartridge technology. From how the oil is absorbed, to the way it's heated and vaporized.

It's how our products deliver exceptional performance. And because our US managed factories are 100% focused on manufacturing cannabis and hemp hardware – with rigorous quality assurance programs – we're able to provide trusted, and reliable products.

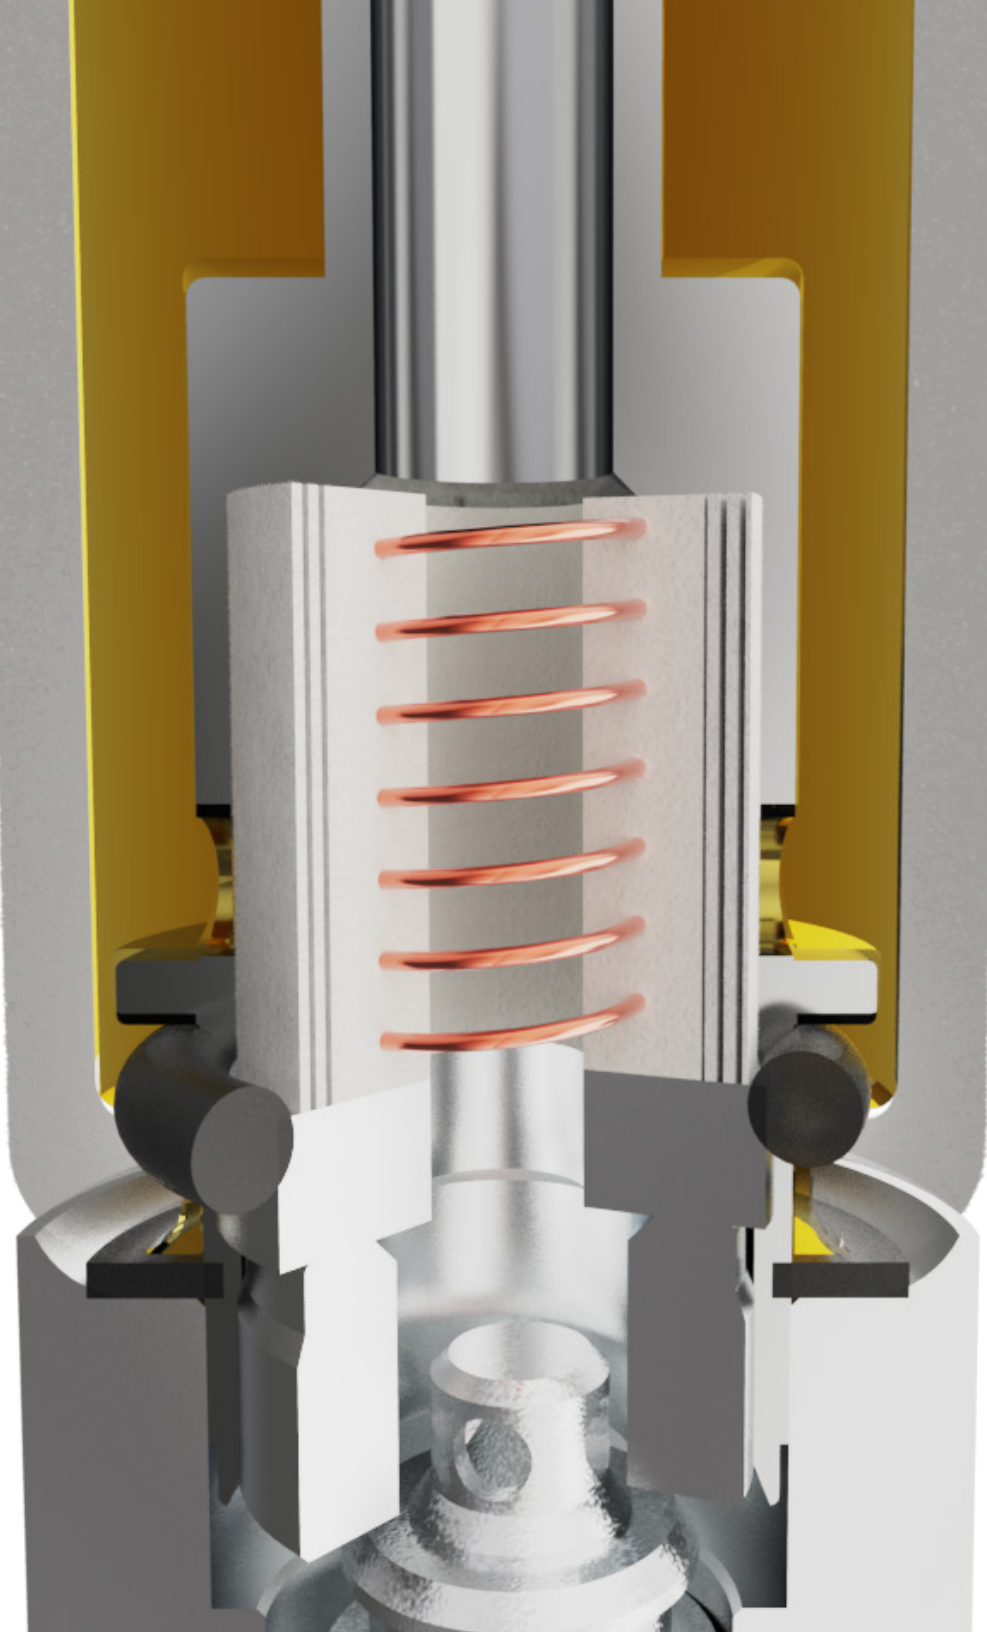

Familiar, yet superior

At the heart of every AVD cartridge and disposable, you'll find our new generation core technology.

Unlike in other premium cartridges, AVD's heating coils are fully encased within the ceramic core and not coated in glycol. The result?

True to strain flavors are preserved through vaporization without overheating and burning.

Altogether, a superior and safer, sensory experience.

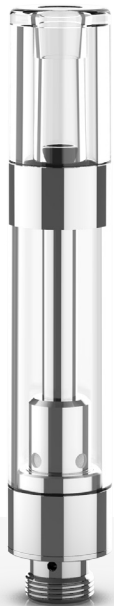

Experience the engineering

- Fully encased heating coil to prevent overheating and burnt flavors
- Two aperture size options, for filling thicker or thinner THC and CBD oils
- Ceramic core design evenly distributes heat for consistent pulls
- Core structure completely absorbs oils avoiding waste and dry-hits
- Various cotton densities control oil flow for perfect vapor flow from the first to the last draw
- Consistent Ohm settings ensures proper voltage delivery, regulating temperature control
- All parts are non-toxic, inert, and pesticide free, to avoid contaminated oil and failed COAs

Cartridges and batteries for all occasions

Your THC and CBD-based terpene-rich formulations are as varied as your customers. Why limit yourself?

Meet the extended family.

AVD C1 POLYSIN CARTRIDGES
0.5 ML | 1.0 ML

AVD C2 GLASS CARTRIDGES
0.5 ML | 1.0 ML

AVD C3 EAZY-PRESS CARTRIDGES
0.5 ML | 1.0 ML

AVD GLASS DISPOSABLES
0.3 ML | 0.5 ML

AVD SEED BATTERIES

AVD CLONE & STIK BATTERIES

AVD C3 Eazy-Press Glass Cartridges

Easily the most advanced cartridge.

Increase filling and capping throughput with the child tamper resistant AVD Eazy-Press.

Designed for rapid, high-end, high-production. A low torque, thumb snap-on locking system, secures the mouthpiece, even without an arbor press.

Cartridge

- **1.0mm** and **2.0mm** aperture options for thinner or thicker oils
- Available in **0.3ml** and **0.5ml** tank capacity
- Top loading and compatible with most filling machines
- AVD proprietary ceramic core for true to strain flavors
- Constructed from durable quartz glass & non-toxic parts

Battery

- Draw activated
- Available with or without a micro USB rechargeable port *
- Discreet size
- Smaller battery, with extended life to reduce environmental impact
- SmartPulse power-wave technology for consistent flavors

* 0.3ml model only available without charge port

AVD Seed Battery

Smooth magnetic cartridge drop-in. Striking ergonomic design.

Haptic vibration feedback for intuitive use. Adjustable low/high heat settings for refined flavor or big clouds. SmartPulse™ intermittent power waves regulate temperature for high terpene extracts or big hits. And a micro-USB port for easy recharging.

Low voltage setting designed to work best with AVD cartridges for high terpene extracts.

- Draw activated without complicated buttons
- Haptic vibration feedback for intuitive use
- Adjustable switch for low 2.4V or high 3.5V
- SmartPulse power-wave technology to control heating
- Long 350mAh battery life carburetor for airflow control
- Short circuit and overcharge protection
- Micro-USB port for easy recharging
- Comes with a 510 thread magnetic drop-in adapter and USB micro charger
- Full charge and low battery LED indicator

AVD Stik and Clone Batteries

Bursting with industry-leading innovations.

The AVD Stik and Clone slim draw breath activated batteries are compact and discreet. An adjustable low/high heat setting for refined flavor or big clouds. SmartPulse™ intermittent power waves regulate temperature for high terpene extracts or big hits. And a micro-USB port for easy recharging.

Low voltage setting designed to work best with AVD cartridges*.

- Draw activated. No complicated buttons
- SmartPulse power-wave technology to control heating*
- Carburetor for airflow control
- Adjustable switch for low 2.4V or high 3.5V *
- Eco-friendly 180 mAh battery with extended charge life*
- No complicated button combinations
- Short circuit and overcharge protection circuit
- Full charge and low battery LED indicator
- Micro-USB port for easy recharging
- Universal 510 thread

* Stik model only

Customize and stand out

Make your mark.

Customize your AVD cartridges, disposables, and batteries with your distinctive branding and trademarks. You can even create special limited edition custom sets for exclusive clients or to celebrate events.

We'll even work with you to create exclusive form factors for your brand. Use your existing design with AVD technology or work with our engineers to create an entirely new concept.

With ultra-fast lead times, AVD's in-house and US-based design experts are ready to advise on a range of design options.*

* For all customization options and parameters, please see our full customization brochure.

Customized cartridges

Leave a lasting brand impression on your customers. Collaborate with AVD's designers on your custom design.

- Logo laser etching
- Custom printing in all pantone colors
- Distinctive mouthpieces
- Custom color finishes
- Compliance symbol printing

Customized disposables

Disposables are the perfect boost for your brand visibility.

- Rubberized battery coating in almost any color
- Distinctive LED battery lighting
- Stylized mouthpieces
- Compliancy etching and printing

Customized batteries

Reinforce your name awareness. AVD batteries are engineered to last. So should your branding.

- Almost any battery color
- LED power on/off light
- Laser engraving and pad printing
- Anodised, powder coating & rubberized finishes
- Metallic, print, and etched finishes
